# BLUECREST™

Epic® inserting system

Insert more at the speed of right.

Fast. Smart. Accurate.

Master multiple formats faster, all on one machine.

93%

The Epic® inserting system helped a client process 235k pieces in a 12 hour shift with 93% overall efficiency.

It's difficult for any high-volume transaction mailer or service provider to anticipate the equipment profiles required to meet your market's fluctuating demands. We decided to make it easier. So, the world-class engineers of BlueCrest simplified elements of our globally proven inserting system, so you can move more efficiently from job to job and from letters to flats. It's called the Epic inserting system.

Built on an industry-proven design, the Epic inserter can:

- Process simple and complex runs more profitably.
- Make changeovers repeatable and consistent via automated setup.
- Easily switch between letter and flats in minutes.
- Lower labor costs while raising operator productivity.
- Achieve greater yields and operational performance.
- Simplify capacity planning.

The results of their innovative engineering helps make uptime more productive, reduces labor and material costs and helps increase profits.

The high-speed yield gives you a competitive advantage.

Epic delivers a higher yield per operator for simple and complex jobs, due in part to a flattened learning curve and significantly reduced, repeatable make-ready times. The dynamic skew correction lowers the risk of a stoppage. Plus, fewer outsorts lessen the need for costly reconciliation and reprocessing. Other advantages of Epic include:

- Multi-format solution that eliminates the need to invest in dedicated systems
- Simplified production planning with increased capacity and better asset utilization
- Greater operational yield, particularly on complex transactional mail.
- Extend uptime with easier access to components and faster mean time to repair
- The predictable yield lets you confidently quote and meet SLAs for simple and complex jobs.

Plus Speed option delivers up to 14% greater productivity

"The versatility and flexibility of the Epic will change the way we manage our production floor."

— Large Service Provider in UK

The ideal combination of speed and accuracy

The enhanced precision material control of the Epic® inserter amplifies the yield of even the most complex mailing. Now, you can confidently quote and meet aggressive — and more profitable — SLAs for simple and complex jobs because Epic can:

- Accurately and easily account for all pieces within a job.
- Achieve higher yield and maximum system uptime with BlueCrest enhanced motion control platform.
- Reduce spoilage and job reconciliation requirements through dynamic on-the-fly corrective adjustments.
- Process complex mail with real-time, integrated, end-to end tracking and control.

Process wide range of materials with rotary and friction feeders

Enhanced material control enables greater operational yield for complex applications

Mail-stream merge with auto resynchronization

High-speed complex continuous form and cut sheet processing

Process more formats from single panels to booklets

Enhanced flexibility with 60% greater flats filling capability

Plus speed option with up to 14% greater productivity

Ergonomic, high capacity feeders and stackers

Experience improved workcell efficiency and quality with NoTouch Changeover

"Now we can actually automate smaller flats jobs with the confidence that we can be back to high speed inserting quickly."

— Henry Perez, Chief Operating Officer, FSSI

5

A more intelligent view into your operations starts here

Clarity™ and DirectView™

The revamped DirectView™ user interface features on-screen, bold color-coded displays that show real-time progress towards job completion. If a current job's completion status changes, the operator is alerted as are supervisors that monitor production. Operators can quickly check a list of prioritized alarms to see the specific problem and take corrective action.

Move from insight to action faster with Clarity™

Gain transparency across your print and mail operation with intelligent insight to help drive maximum operational performance, efficiencies and cost savings. Adding Clarity to your operation enables predictive and collaborative course correction with greater insight into the interaction between machines, jobs and operators.

- Gain precision in your decisions with 24/7 visibility.
- Understand the root cause of operational issues across system, workcell, operators or workflow.
- Optimize capacity planning to meet SLAs.
- Meet stringent requirements for regulatory and data security.

Where industry-leading support meets successful outcomes

BlueCrest offers world-class support and comprehensive services that optimize your Epic inserting system. You can count on BlueCrest Global Services to address your unique operational needs.

- Leverage the proven skills and expertise of our dedicated global team for best-in-class installation, integration and implementation services.
- Achieve optimal performance with industry leading technical and maintenance support.

- Ensure maximum system uptime through real-time insights and predictive analytics that enable our global experts to make informed decisions and quickly resolve performance issues.

Configure Epic® to meet your unique needs.

Epic's productivity and revenue enhancing capabilities include:

- Continuous form and cut sheet input processing
- High-speed, multi-stream merging with auto resynchronization
- Integrity scanning and document match
- 100% variable full-color insert and envelope printing
- Output integrity verification
- Postal metering
- Booklet feeding
- Dynamic stitching
- ADF Solutions

No need to compromise between high-speed letter processing and flats. The Epic inserter consistently delivers accurate high-integrity results for simple and complex transactional processing.

"The speed of the Epic® has significantly increased our daily capacity without us having to incur additional personnel or overtime costs."

— Large Service Provider in US

Our modular, platform meets your needs now and in the future as it makes future upgrades simple.

	Epic Select	Epic	Plus Speed Option
Tri fold	Up to 21K	Up to 21K	Up to 24K
Half fold	Up to 18K	Up to 18K	Up to 21K
Flats	N/A	Up to 14K	Up to 16K (Epic only)
Feeders	Rotary, Friction	Rotary, Friction, Booklet	
Format		Continuous & Cut sheet	

Plus Option

The Plus speed option available on both the Epic and Epic Select allows you to process jobs up to 14% faster without compromising precision material control and accuracy.
