

Print+ Select™ monochrome inkjet printer

Gain speed, flexibility and cost-savings with inline envelope printing.

Print a wider range of personalized envelope formats in-line, during mail finishing. The Print+ Select monochrome inkjet printer enables you to print logos, addresses, barcodes and more at accelerated speeds and lower costs. It can print a wide range of envelope sizes and substrates, so you can

process more job types with greater efficiency. Plus, with the ability to add personalized content to the outside of mailpieces, you can onboard new clients faster and gain a competitive advantage.

Print envelopes more cost-effectively:

- Save money with lower cost per mail-piece.
- Eliminate storage, waste and obsolescence cost of pre-printed envelopes.
- Start every job with plain white envelopes.

Improve productivity and throughput with accuracy and security:

- Print envelopes at up to 22,000 pieces per hour inline during mail finishing.
- Process with precision, using a secure, intelligent print controller – powered by Direct Connect™ technology.
- Assure privacy and compliance using closed-faced envelopes.

Support a wider range of applications with ease:

- Print on a wide range of envelope sizes and paper stocks including express envelopes, double wide, or direct mail.
- Configure to various print widths up to 8.5”.
- Support printing on a wide range of envelope substrates including coated stock with optional ink set.
- Leverage Print+ Composer™ solution to easily create envelope templates.

Enhance operational performance:

- Enjoy simple inserter set-up and operation.
- Commingle jobs for postage savings and greater efficiency.
- Increase productivity by streamlining workflow processes.
- Integrate seamlessly with inserters from BlueCrest, including:
 - Mailstream Evolution™, Direct and Productivity Series.
 - Rival™ inserting system.
 - Epic® inserting system.

Produce personalized envelopes with dynamic content:

- Print high quality text and graphics.
- Meet USPS® Intelligent Mail® standards for postal barcodes.
- Produce Express Carrier compliant labels (FedEx, UPS and USPS).
- Add personalized offers and messages in monochrome.
