

EZ-Flats™ and EZ-Flats™ Pro sorting systems

Maximize your mailing discounts.

Shippers who process more than 200 flats or parcels per day can't be delayed by complex logistics and scheduling rules. EZ-Flats and EZ-Flats Pro sorting systems from BlueCrest provide a way to leverage USPS discounts and expedite processing.

Our sorting solutions are modular and easy to configure to your unique work requirements. They're ideal for a variety of applications including fulfillment houses, direct mailers, commercial printers, services bureaus, as well as enterprise mail rooms. The EZ-Flats sorting systems help you to stem the tide of regulatory price changes.

With EZ-Flats™ and EZ-Flats™ Pro, you'll enjoy:

- **Greater discounts in one pass:** Our systems utilize unique software packages that scan and direct flats or parcels for the maximum discount in a single process.
- **Quick setup and easy-to-use operation:** On average, first time operators are up to speed and running the system in as little as 15 minutes.
- **Mail piece integrity:** Through territory designation assignments, our systems ensure mail integrity.
- **Refined accounting accuracy:** You'll be able to access billing and audit documentation quickly and easily.
- **USPS submission compliance:** Create manifest mailings simply and accurately.
