AUTOMATION

Push Sorter
Where precision meets performance

Upgrade your logistics operation with cutting-edge sorting technology

Kick-start your warehouse automation with our Push Sorter; the cost-smart sortation module that delivers premium accuracy without the premium price tag. Engineered for plug-and-play modularity the Push Sorter drops effortlessly into a full intralogistics line or operates standalone, so you can scale at your own pace. Precise lateral diverting keeps parcels flowing smoothly and reliably, boosting uptime and throughput while laying a rock-solid foundation for future growth.
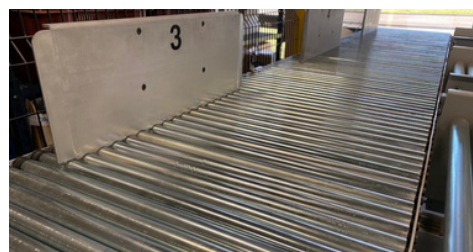

Push Sorter

Optimise now, scale later

From distribution hubs to e-commerce and omnichannel operations, the Push Sorter delivers cost-effective, scalable performance wherever precise, reliable sortation is required. Perfectly suited for small-item handling, the Push Sorter is an ideal entry point solution into automation for courier services, e-commerce fulfillment, and distribution companies - delivering cost-effective, scalable performance right from day one.

Push Sorter Key Advantages:

- ☑ **Wide-Range Parcel Mastery** – Handles mixed sizes and weights with pinpoint accuracy.
- ☑ **Gentle, Low-Impact Diverts** – Keeps fragile or irregular items safe in transit.
- ☑ **Slim, Modular Footprint** – Drops into almost any layout and scales as you grow.
- ☑ **Flow-Optimised Throughput** – Maintains a steady, congestion-free stream of parcels.
- ☑ **Choice of Power** – Available in all-electric or electro-pneumatic versions to match your energy strategy.
- ☑ **Adaptive Sorting Logic** – Easily reconfigures for new SKUs, destinations, or business rules.
- ☑ **Rugged & Low-Upkeep** – Engineered for long life with minimal service downtime.
- ☑ **Energy-Savvy Design** – Minimises consumption and supports your sustainability goals.
