

Pop Up Sorter

Pop Up Sorting Module

Enhance your sorting operations with our Pop Up Module, a mid-range sortation system designed for superior versatility, modularity, and efficient flow management.

Pop Up Sorter

Modular Performance for Intralogistics Excellence

An adaptable structure allows seamless integration into either complete intralogistics systems or standalone applications. The Pop Up Module ensures smooth, reliable and consistent parcel redirection - maximising operational uptime, optimising flow, and supporting scalable logistics. From distribution centres to e-commerce and omnichannel logistics, the Pop Up Module delivers scalable, efficient performance across a wide range of applications.

Pop Up Sorter Key Advantages:

- ✓ **Versatile Parcel Handling** – Efficiently manages parcels of various sizes with consistent precision.
- ✓ **Smooth and Gentle Redirection** – Ideal for fragile and non-standard packages.
- ✓ **Modular and Compact Design** – Easily integrates into a wide range of layouts.
- ✓ **Optimised Flow Management** – Supports steady throughput and smooth logistics processes.
- ✓ **Flexible Sorting Logic** – Adaptable to diverse operational needs and configurations.
- ✓ **Durable and Low Maintenance** – Built for long-term reliability with minimal service requirements.
- ✓ **Energy-Efficient Operation** – Designed to reduce consumption and promote sustainability.
- ✓ **Electric and Pneumatic versions available** – Flexible configurations to suit different operational and energy requirements.

TECHNICAL DATA	
Parcels dimension	Min. 150 x 100 x 5 mm / Max. 1200 x 800 x 800 mm (LxWxH)
Parcels weight	Min. 100 g / Max. 50 kg
Parcels type	Boxes, polybags
Linear Conveyor Speed	Up to 2.0 m/s
Transmission	Double Gearmotor (individual rollers and belt)
Side Guides Height	Double sided - 200 mm, 300 mm, 400 mm
Surface Under Belt	Galvanized steel / Inox on request
Inverter	Profinet as standard
Conveyor Height	Customisable from 800 mm to 2000 mm
No. of rollers	Max. 12 each unit
